#### EXECUTIVE SUMMARY

Disruption is the new normal. To succeed, businesses must be agile enough to manage and embrace the impact of new technologies, as well as to adapt to new realities in a rapidly evolving environment.

In an age characterised by rapid and continuous change, projects have become the core of strategic digital transformation—they are how change happens. Having the talent to implement evolutionary initiatives successfully is a critical capability that is going to give organizations a competitive advantage to navigate the Fourth Industrial Revolution.

The **Project Management MasterClass (Intermediate)** will give you an overview of project management and empower you to embrace PMBOK methodologies and apply them to high-priority projects that will enable your organisation to remain relevant and competitive in the digital age.

#### RATIONALE

Organizations that succeed in this age of disruption are those that adapt rapidly to new opportunities and challenges. Forward-thinking organizations are building better products and creating stronger customer relationships with a speed that hasn't been seen before.
